

Google's Gemini App Can Now Remember or Forget Past Conversations

<https://biztoc.com/x/ce2dd044bee2f5ae>

- Google's Gemini app has introduced new features that enable users to instruct the AI assistant to remember or forget previous chat interactions.
- The rollout of these memory management features began today and will continue over the next few weeks.
- This update aims to enhance user control over their interactions with the AI assistant.
- Users can customize their experience with Gemini by choosing what information to retain or remove.
- The update reflects Google's ongoing efforts to improve AI customization and user privacy.

SoftBank's \$500B AI Moonshot Hits Speed Bump--But Son Isn't Slowing Down

Hernán Crespo sends message after draw with Atlético Nacional

<https://onefootball.com/en/news/hernan-crespo-sends-message-after-draw-with-atletico-nacional-41509220>

- Atlético Nacional and São Paulo drew in the first leg of the Copa Libertadores round of 16, surprising São Paulo's coach Hernán Crespo.
- Despite controversial refereeing decisions during the match, Crespo chose not to comment on the officiating.
- The decisive second leg will take place on August 19 in Brazil, where the teams will compete for a spot in the quarterfinals.
- São Paulo successfully managed to survive two penalties during the match.
- The article covers a range of football topics, including updates from the Copa Libertadores and other leagues, showcasing ongoing developments in football.

Cybercrime wave sweeps Canada with 12 billion attacks in first half of 2025

<https://m.economictimes.com/news/international/canada/cybercrime-wave-sweeps-canada-with-12-billion-attacks-in-first-half-of-2025/articleshow/123293911.cms>

- Canada experienced over 12 billion cyberattack attempts in the first half of 2025, marking an unprecedented surge in cybersecurity threats.
- Fortinet's cybersecurity analysts are actively combating cybercriminals who are increasingly utilizing crime-as-a-service business models.
- Artificial Intelligence has become essential for managing the high volume of cyber threats and for protecting critical infrastructure within the country.
- The article also touches on various other topics, including a state of emergency due to wildfires, a potential nationwide strike by Air Canada flight attendants, and delays in travel due to adverse weather conditions.
- The overall focus is on the urgent need for enhanced cybersecurity measures in Canada amidst a growing threat landscape.

Thailand's Delta sees AI boom boosting sales for coming years

<https://www.japantimes.co.jp/business/2025/08/14/tech/thailand-delta-ai-boom/>

- Delta Electronics (Thailand) anticipates continued "double-digit" sales growth for the next few years due to increasing demand for AI-related technologies, according to CEO Victor Cheng.
- The company, a leading manufacturer of components for data centers and electric vehicles, is increasing its investments to support expansion.
- Delta plans to revise its sales forecast for the second half of this year but has not disclosed specific figures.
- AI-related products are projected to make up 50% of Delta Thailand's sales by year-end, rising from 42% in the latest quarter.
- The company is benefiting from the expansion activities of clients like Nvidia in Southeast Asia, driven by the growing demand for generative AI services.
